

SI-BOX

"The obvious choice on the Market"

Self-powered ABS Indoor Siren

New ABS range

- Discover **SI-BOX**, the fruit of ALTEC technology combined with over 10 years of expertise in manufacturing security equipment.
- We have chosen an ABS material for the **SI-BOX**, to make it more pleasing to the eye.
- The electronic part was particularly good with a high level of technical performance. The **SI-BOX** is equipped with a self-protection for the opening and removal, this new version has 4 dip switches that allow the selection of the power consumption, management of self-protection in opening and pull, the blocking by a 12 VDC or 0 VDC.
- When you choose a **SI-BOX**, you're choosing a siren with a 5 year guarantee and quality that has not yet been rivalled by any product in this category.

FEATURES

Presentation

- ABS box UV protected / V0 flammability rating
- Self-protected box in the opening and pullout
- Dimensions : 155 x 120 x 45 mm
- Operating temperature : from - 10° C to + 55° C
- Weight : 708 g
- Complies with EN 50131-4, EN 50130-4, EN 55022 and EN 60950
- IP 31 and IK 07
- Space for 9V alkaline battery or accumulator 9 V Ni-Mh (not supplied)

Power

- Operating voltage 12V in direct : from 9 to 15 VDC
- Operating voltage 12V in charge : from 10 to 14 VDC
- Consumption in standby : 1 mA max
- Consumption in alarm : 300 mA (110 dBA) or 50 mA (100 dBA)
- Protection against surges, electrostatic discharge and reverse polarity
- Autonomy in the internal battery or accumulator 36 hours

Operation

- 1 input command [sir]
- Duration of the alarm timer to 10 minutes
- 1 dipswitch to select the power and consumption
- 1 dipswitch to a command on positive or negative polarity
- 1 dipswitch to trigger in appear or disappear of the command signal
- 1 dipswitch for management of the tamper only in the opening or in the opening + pullout
- Sound power at 1 meter :
 - > 110 dBA or > 100 dBa
